

The Seven Steps to HIPAA Security ComplianceTM

ecfirst's **The Seven Steps to HIPAA Security ComplianceTM** is a *bizSHIELDTM* methodology that goes beyond the requirements of the HIPAA Security Rule. It is a road-map to safeguard not just Electronic Protected Health Information (EPHI) but the organization's information assets as a whole. This methodology has also been influenced by the domains defined in the **ISO 27000** as well as the **CobIT** and **NIST** security frameworks.

The **Seven Steps** methodology delivers *confidentiality, integrity and availability* (CIA) of your EPHI and other vital assets.

The **Seven Steps** methodology is **ecfirst's** pathway to HIPAA Security compliance. It is the foundation of our *bizSHIELDTM* Compliance Practice. Rich in hands-on security consulting experience, we are ready to address your compliance requirements.
